

Carbon FT-One Fit™ Tower

Your Vertical Advantage

The Carbon FT-One Fit™ Tower is the next-generation full-body safety harness designed for female tower climbers.

Engineered for a precise fit, unmatched comfort, and superior mobility, this harness eliminates the compromises of generic designs. Featuring exclusive hip adjustability, a lightweight carbon fiber seat, and Comfort Legs® straps, the Carbon FT-One Fit Tower moves with you—offering the support and protection you need to climb with confidence.

The Carbon FT-One Fit Tower features the breakthrough MDS™ modular deployment system. This FallTech innovation uses a powerful neodymium magnetic connector for effortless seat deployment and stowing. Innovation extends to another FallTech-exclusive: Lateral Comfort Legs straps that give you freedom of movement for every ascent.

Designed specifically for female tower climbers, the Carbon FT-One Fit™ Tower enhances safety without sacrificing performance. Every detail is built to support the unique demands of women working at height, giving you lasting comfort and security in every climb.

The Carbon FT-One Fit Tower is available in a 6 D-ring configuration and your choice of quick-connect or tongue buckle leg closures.

With the Carbon FT-One Fit Tower, you get more than just a harness—you get the confidence to push higher.
