

Carbon FT-Arc™ Fit Tower

The New Possible in Arc Flash Protection –

Customized to Her Shape

The Carbon FT-Arc Fit Tower is the next-generation harness built for female tower climbers facing the most challenging environments.

The Carbon FT-Arc Fit Tower is the first and only tower harness with an adjustable sub-pelvic hip strap that ensures a proper fit for all body types. No more compromises—this durable, lightweight harness delivers a personalized fit for all-day comfort and support.

Engineered for both comfort and performance, the Carbon FT-Arc Fit Tower features a revolutionary carbon fiber bosun seat, providing lightweight, ergonomic support at height. This seat operates in tandem with MDS™. This breakthrough modular deployment system uses a powerful neodymium magnetic connector for effortless seat deployment and stowing.

The Carbon FT-Arc Fit Tower delivers the premium design benefits expected from FallTech:

- ArrowGrip® D-ring plate that keeps your dorsal D-ring secure, minimizing adjustments throughout the day.
- Updated SRL attachment point for quick, hassle-free connection of single- and twin-leg SRLs without fumbling with webbing.
- Upgraded lanyard keepers that ensure secure, ANSI-compliant functionality for single and double-leg lanyards.
- Exclusive Comfort Legs™ lateral leg straps that enhance mobility and comfort by eliminating pressure points.

The Carbon FT-Arc Fit Tower is built for women who refuse to compromise—because there's no room for concessions when it comes to safety, comfort, and performance.
