

Get the Right Fit: FT-Lineman Pro Belt™ Sizing

D-Ring Sizing

While wearing normal work clothing, measure from the highest point of one hip bone, around your back, to the highest point of the opposite hip bone. The FT-Lineman Pro Belt requires an additional 4 inches beyond your hip-to-hip measurement to determine the appropriate D-ring size.

Example: 23" hip-to-hip measurement + 4" = D-27

The additional 4 inches:

2" positions the D-rings forward for improved comfort.
2" accommodates the FT Lineman Pro padding.

Note: For the most accurate fit, always determine your D measurement using a tape measure or sizing belt. Avoid using the D size of your current belt as a reference, as it may not reflect your true sizing.

STANDARD BELTS	
SIZE	D-RING SIZE
SMALL	D18 - D23
MEDIUM	D21 - D26
LARGE	D24 - D29
EXTRA LARGE	D27 - D32
