

5030

Controlled Descent Kit

Features :

- 1 1/32" sheathed-core kernmantle rope lifeline resists moisture and abrasion for longer life
- Lifeline assembly includes two sewn-end terminations with alloy steel carabiners for user connection.
- Constant 2.6' per second single-user descent speed
- Features lightweight aluminum housing and pivoting alloy steel anchorage eye
- Descent kit also includes alloy steel anchorage carabiner and storage bag
- Complies with ANSI Z359.4-2013

Material Specifications	
Rope	1 1/32" kernmantle polyamide blend
Connectors	Plated alloy steel; 5,000 lb min. static strength with 3,600 lb gate strength
Housing	Powder coated aluminum

Performance Specifications	
Max Descent Height	525' Single User
Max Descent Load	440 lb Single User
Descent Speed	2.6' per second Single User
Cumulative Descent Distance	25,152' with 220 lb
Cumulative Descent Distance	2,620' with 440 lb

Compliant With:	
ANSI	Z359.4-2013
