

Concrete Anchor Backer Plate (Part of a complete anchorage system)

RC-BKRPLT

Features

- Suitable for concrete structures and steel beams (I-beams)
- Designed for through-bolt installation on structures
- Structural backing plate compatible with RC anchor systems
- Easy installation with standard threaded rod hardware

Design Specifications

Material	ASTM A36 steel
Thickness	0.35"
Width	11"
Finish	Hot-Dip Galvanized
Min. Anchorage Strength	5,000 lbf (22.2 kN)
Required Hardware	(6) 1/2" ASTM A307 rods, nuts & lock washers (not included)
Applications	Concrete Structures / Steel Beams
