

APEX SAFETY GOGGLES

The Malta Dynamics APEX Safety Goggles are engineered for reliable eye protection in the most demanding environments. Featuring a dual injected rubber seal, they create a comfortable barrier against dust, debris, and airborne hazards while maintaining a streamlined fit that pairs seamlessly with hard hats and helmets. The adjustable head strap and quick-release clip allow for a secure, custom fit and make it easy to take the goggles on and off without slowing down your work.

Built with performance in mind, the APEX Safety Goggles include an anti-fog lens coating and integrated ventilation channel to deliver clear vision in hot, humid, or fast-changing conditions. They meet ANSI/ISEA Z87.1-2020 standards and are available with clear or tinted lenses in single, 3-pack, or 12-pack options—providing crews with a dependable and cost-effective solution for professional-grade eye protection on every jobsite.

KEY FEATURES

1. Anti-fog lens coating maintains visibility in hot, humid, or changing conditions
2. Adjustable head strap for a secure and comfortable fit
3. Dual injected rubber seal provides protection from dust, debris, and airborne hazards

- Head strap clip allows easy on and off with hard hats and helmets
- Built-in ventilation channel reduces fogging while keeping out particles
- Available with clear or tinted lenses in single, 3-pack, or 12-pack options
