

30' SINGLE USER LIFELINES

Our Malta Hunting Safety 30' Lifelines are built to help keep hunters connected from the ground, through the climb, during the sit, and all the way back down. Designed for single-user tree stand setups, the 30-foot length works with stands up to 25 feet and gives hunters the reach and flexibility needed for a wide range of hunting situations.

Each lifeline includes a Dual-Action Twist Lock Carabiner for a secure connection and pre-installed prusik knots to make setup quick and efficient. Once properly installed, the system helps provide continuous fall protection throughout the hunt, not just while you are sitting in the stand.

Available in reflective and non-reflective options, the 30' Lifeline lets hunters choose the setup that fits their style. The reflective option is easy to identify in low-light conditions with the help of a small beam of light, while the non-reflective option delivers the same dependable performance without added visibility.

PART #	SIZE	WEIGHT
HEA4000	30 FEET	2.6 LBS
HEA400I	30 FEET	2.6 LBS

KEY FEATURES

1. Reflective & Non-Reflective Rope Material
2. Includes Dual-Action Twist Lock Carabiner
