

CORE™ HARNESS

The CORE™ Harness gets back to the essentials of tree stand safety. No unnecessary extras. No overcomplicated design. Just the comfort, function, and protection hunters need every time they climb.

Built on a strong foundation of proven fall protection experience, the CORE™ is designed to deliver dependable performance in a simple, streamlined package. Comfortable padding across the back, shoulders, and legs helps make long sits easier, while durable 1" webbing and lightweight pass-through buckles keep the design secure, simple, and easy to use in the field.

At approximately 2 lbs., the CORE™ includes sewn-in lineman's climbing strap loops and quiet materials to help keep unwanted noise to a minimum in the stand. Every feature has a purpose, keeping the harness focused on what matters without adding unnecessary bulk or unnecessary cost.

Every CORE™ Harness Kit includes an CORE™ Hunting Harness, Tree Strap, and Deer Drag/Suspension Relief Strap

Tested to ASTM F2337 standards, the CORE™ harness supports hunters up to 300 lbs.
