

HUNTER'S ELITE

Harness By MALTA DYNAMICS

HUNTER'S ELITE HUNTING HARNESS

Hunters are well used to the dangers that lurk in the woods, so the possibility of a fall from the tree stand frequently gets overlooked. Nothing really springs someone into action like a fall does, but the goal here is preventative not corrective. The Hunter's Elite Fall Protection Harness from Malta Dynamics is crafted with the avid hunter in mind. This harness features Strata or Kanati camouflage pattern options from the TrueTimber collection to keep you hidden from your prey and safe from a fall. The Hunter's Elite comes complete with a suspension relief/deer drag strap, lineman's climbing strap, tree strap, and harness with a shock absorbing tether. Everything you need to keep you safe while you scale the tree to get to your hunting stand. To keep you comfortable and quiet for hours, this harness has been fitted with silent padding on the shoulders, legs, back, and waist. The buckles on the Hunter's Elite stay silent while you move because we've incorporated elastic band coverings for the metal components to eliminate clinking, and the climbing/connector loops are made from high strength polyester instead of metal to eliminate sounds that might spook your target. Feel confident in every climb with the Hunter's Elite Safety Harness from Malta Dynamics.

PART #	PATTERN	SIZE	WEIGHT
HE2200	Kanati	S-M	4.6 lbs
