

LADDER STABILIZER

18.5 Ladder Stand-Off

Part ID: 48599

The TranzPorter Standoff Stabilizer is built exclusively for the TP250 and TP400 platform hoists, adding critical stability and roof clearance for safer, damage-free operation.

Designed to attach directly to the hoist track, it provides a firm, elevated working position while helping protect gutters and roofing materials from contact or stress.

With a secure pin-lock system and durable steel construction, this 12 lb. stabilizer adds peace of mind to every job.

Key Features

- Stabilizes TP250, and TP400 TranzPorter hoists on roof or walls of house
- Protects gutters, siding, and paint finishes on re-roof jobs
- Fast, pin-lock attachment to hoist track
- Strong, lightweight steel construction
- Compact for easy transport and storage
