✗ Do not throw instructions away.

⚠ Read and understand instructions before using this equipment.

Worker Classifications

- **Qualified Person:** A person with an accredited degree or certification, and with extensive experience or sufficient professional standing, who is considered proficient in planning/reviewing the conformity of fall protection and rescue systems.
- **Competent Person:** A highly trained and experienced person who is ASSIGNED BY THE EMPLOYER to be responsible for all elements of a fall safety program, including, but not limited to, its regulation, management, and application. A person who is proficient in identifying existing and predictable fall hazards, and who has the authority to stop work in order to eliminate hazards.
- **Authorized Person:** A person who is assigned by their employer to work around or be subject to potential existing fall hazards.

Applicable Safety Standards

Meets or exceeds:

- **OSHA 1910.140**
 - **OSHA 1926.502**
-

Permitted User Weight

- User weight range (including all clothing, tools, and equipment) is:
130-310 lb (59-140 kg)
-

Product Specific Applications

Fall Arrest: This VLA may be used to support a MAXIMUM 1 Personal Fall Arrest System (PFAS) for use in Fall Arrest applications. Structure must withstand loads applied in the directions permitted by the system of at least 5,000 lb (22,2 kN) Maximum permitted free fall is 6 ft (1,8 m). Maximum combined length of D-ring, Fall Arrester, and Lanyard Extension is 36 in (0,9 m). **D-rings: Dorsal.**

Restraint: This VLA may be used in Restraint applications. Restraint systems prevent workers from reaching the leading edge of a fall hazard. Always account for fully extended length of connecting equipment. Structure must withstand loads applied in the directions permitted by the system of at least 1,000 lb (4,4 kN). No free fall is permitted. Restraint systems may only be used on surfaces with slopes up to 4/12 (vertical/horizontal). **D-rings: Dorsal, Sternal, Hips (pairs only).**

Product Specifications

Part #	Length	Description
01310	25 ft (7,6 m)	Vertical Lifeline Assembly w/Shock Absorber, Positioning Device
01320	50 ft (15,2 m)	Vertical Lifeline Assembly w/Shock Absorber, Positioning Device
01323	75 ft (22,8 m)	Vertical Lifeline Assembly w/Shock Absorber, Positioning Device
01324	100 ft (30,4 m)	Vertical Lifeline Assembly w/Shock Absorber, Positioning Device
01325	130 ft (39,6 m)	Vertical Lifeline Assembly w/Shock Absorber, Positioning Device
01326	150 ft (45,7 m)	Vertical Lifeline Assembly w/Shock Absorber, Positioning Device
01327	200 ft (60,9 m)	Vertical Lifeline Assembly w/Shock Absorber, Positioning Device
11318	30 ft (9,1 m)	No Tangle VLA w/Swivel Snap Hook, Shock Absorber, Positioning Device, and 18 in Lanyard Extension
11320	50 ft (15,2 m)	No Tangle VLA w/Swivel Snap Hook, Shock Absorber, Positioning Device, and 18 in Lanyard Extension
11329	25 ft (7,6 m)	Co-polymer Rope w/Snap Hook End
11330	30 ft (9,1 m)	Co-polymer Rope w/Snap Hook End
11331	50 ft (15,2 m)	Co-polymer Rope w/Snap Hook End
11332	75 ft (22,8 m)	Co-polymer Rope w/Snap Hook End
11333	100 ft (30,4 m)	Co-polymer Rope w/Snap Hook End
11334	150 ft (45,7 m)	Co-polymer Rope w/Snap Hook End
11335	200 ft (60,9 m)	Co-polymer Rope w/Snap Hook End
11321	25 ft (7,6 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
11322	30 ft (9,1 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
11323	50 ft (15,2 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
11324	75 ft (22,8 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
11325	100 ft (30,4 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
11326	130 ft (39,6 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
11327	150 ft (45,7 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
11328	200 ft (60,9 m)	VLA w/3-Strand Co-polymer Rope, Shock Pack, Positioning Device, and 18 in Lanyard Extension
01330	25 ft (7,6 m)	% in Diameter Rope w/Snap Hook End
01340	50 ft (15,2 m)	% in Diameter Rope w/Snap Hook End
01350	75 ft (22,8 m)	% in Diameter Rope w/Snap Hook End
01360	100 ft (30,4 m)	% in Diameter Rope w/Snap Hook End
01365	150 ft (45,7 m)	% in Diameter Rope w/Snap Hook End
01345	200 ft (60,9 m)	% in Diameter Rope w/Snap Hook End
01346	300 ft (91,4 m)	% in Diameter Rope w/Snap Hook End
VL100-CC	100 ft (30,4 m)	% in Diameter Yellow Steel Rope w/ Carabiners Both Ends

Materials

5/8 in diameter co-polymer, polyester and steel.

Rope with Snap Hook end

Snap Hook

Vertical Lifeline Assembly with Positioning Device

Shock Absorber

Positioning Device

Shock Absorber

Positioning Device

Limitations

Fall Clearance: There must be sufficient clearance below the work surface to arrest a fall before the user strikes the ground or an obstruction. When calculating fall clearance, account for a MINIMUM 2 ft (0,6 m) safety factor, deceleration distance, user height, length of lanyard/SRL, harness stretch, free fall, and all other applicable factors.

See Diagram A on page 11.

Swing Falls: Prior to installation or use, make considerations for eliminating or minimising all swing fall hazards. Swing falls occur when the anchor is not directly above the location where a fall occurs. Always work as close to in line with the anchor point as possible. Swing falls significantly increase the likelihood of serious injury or death in the event of a fall.

Compatibility

When making connections to the VLA, eliminate all possibility of roll-out. Roll-out occurs when interference between a connector and the attachment point causes the connector gate to unintentionally open and release.

All connections must be selected and deemed compatible with the VLA by a Competent Person.

All connector gates must be self-closing, self-locking, and withstand a minimum load of 3,600 lb (16,0 kN).

See Diagram B on page 11 for examples of compatible and incompatible connections.

Maintenance, Cleaning, and Storage

Cleaning after use is important for maintaining the safety and longevity of the VLA. Remove all dirt, corrosives, and contaminants from the VLA before and after each use. If a VLA cannot be cleaned with plain water, use mild soap and water, then rinse and wipe dry. NEVER clean harness with corrosive substances.

When not in use or during transport, store equipment where it will not be affected by heat, light, excessive moisture, chemicals, or other degrading elements.

Installation and Use

- ⚠ **Never for Leading Edge (LE) use. VLA must never impact edge of fall hazard.**
- ⚠ **One connection per VLA. Never attempt to remove components from VLA.**
- ⚠ **NEVER tie knots in lifeline, and always ensure end of lifeline is terminated to eliminate risk of detachment of Fall Arrestor.**
- ⚠ **NEVER install VLA in a tie-back method (do not wrap VLA around anchor point and connect snap hook back to rope).**
- ⚠ **If working in Fall Arrest, and if VLA rope does not include integral shock absorber, Fall Arrestor/Extension Lanyard must include shock absorber.**

Step 1

Ensure either that there is always adequate fall clearance for VLA to arrest fall (Fall Arrest), or that VLA will not allow the user to reach the leading edge of any fall hazard (Fall Restraint). Eliminate or minimize all risk of swing fall.

Step 2

Note: Type A VLAs are intended for use with the shock absorber component connected to the anchorage connector. Type B VLAs are intended for use with the shock absorber component connected to the applicable harness D-ring.

Type B - Snap Hook to Dorsal D-Ring

Positioning Device

For both Type A and Type B VLAs, connect the snap hook on the rope positioning device to the applicable harness d-ring. Type A VLAs will have an 18 in non-shock absorbing extension lanyard integrated into the positioning device; Type B VLAs will have a shock absorbing component integrated into the positioning device.

Step 3

Connect the remaining hook at the end of the VLA lifeline to the anchorage connector.

Step 4

To move along lifeline, compress and hold Fall Arrestor handle. ALWAYS adjust Fall Arrestor to reduce slack in the system as much as possible.

When attached to Fall Arrestor and moving along work surface, ALWAYS do so by moving Fall Arrestor along rope, and NEVER by moving only the rope itself. For example, if moving from a roof edge to the roof peak, engage handle of Fall Arrestor and move it up the VLA while walking to peak. DO NOT move up to roof peak by moving VLA and keeping Fall Arrestor stationary; doing so can create free fall in excess of levels permitted by system.

■ Step 5

To restrict Fall Arrester movement along lifeline, release Fall Arrester handle. NEVER grab the Fall Arrester in the event of a fall; doing so may cause the unit to accidentally disengage and slip along the rope.

VLA Types

Type A VLA - Rope w/Integral Shock

Type B VLA - Fall Arrester w/Integral Shock

Fall Arrester w/out Integral Shock

Rope w/out Integral Shock

Inspection

Prior to EACH use, inspect VLA for deficiencies, including, but not limited to, corrosion, deformation, pits, burrs, rough surfaces, sharp edges, cracking, rust, paint build-up, excessive heating, alteration, broken stitching, fraying, and missing or illegible labels. IMMEDIATELY remove VLA from service if defects or damage are found, or if exposed to forces of fall arrest.

Ensure that applicable work area is free of all damage, including, but not limited to, debris, rot, rust, decay, cracking, and hazardous materials. Ensure that work area will support the application-specific minimum loads set forth in this manual. Work area MUST be stable.

At least every 12 months, a Competent Person (CP) other than the user must inspect VLA.

Inspections MUST be recorded in inspection log in instruction manual and on equipment inspection grid label. The CP must sign their initials in the box corresponding to the month and year the inspection took place.

During inspection, consider all applications and hazards the VLA has been subjected to.

Product lifetime is indefinite as long as it passes pre-use and CP inspections.

This inspection log must be specific to one VLA. Separate inspection logs must be used for each harness. All inspection records must be made visible and available to all users at all times. If equipment fails inspection it must be discarded immediately.

Safety Information

⚠ WARNING! Failure to understand and comply with safety regulations may result in serious injury or death. Regulations included herein are not all-inclusive, are for reference only, and are not intended to replace a Competent Person's judgment or knowledge of federal or state standards.

Do not alter equipment. Do not misuse equipment.

Workplace conditions, including, but not limited to, flame, corrosive chemicals, electrical shock, sharp objects, machinery, abrasive substances, weather conditions, and uneven surfaces, must be assessed by a Competent Person before fall protection equipment is selected.

The analysis of the workplace must anticipate where workers will be performing their duties, the routes they will take to reach their work, and the potential and existing fall hazards they may be exposed to. Fall protection equipment must be chosen by a Competent Person. Selections must account for all potential hazardous workplace conditions. All fall protection equipment should be purchased new and in an unused condition.

Fall protection systems must be selected and installed under the supervision of a Competent Person, and used in a compliant manner. Fall protection systems must be designed in a manner compliant with all federal, state, and safety regulations. Forces applied to anchors must be calculated by a Competent Person.

Harnesses and connectors selected must be compliant with manufacturer's instructions, and must be of compatible size and configuration. Snap hooks, carabiners, and other connectors must be selected and applied in a compatible fashion. All risk of disengagement must be eliminated. All snap hooks and carabiners must be self-locking and self-closing, and must never be connected to each other.

A pre-planned rescue procedure in the case of a fall is required. The rescue plan must be project-specific. The rescue plan must allow for employees to rescue themselves, or provide an alternative means for their prompt rescue. Store rescue equipment in an easily accessible and clearly marked area.

Training of Authorized Persons to correctly erect, disassemble, inspect, maintain, store, and use equipment must be provided by a Competent Person. Training must include the ability to recognize fall hazards, minimize the likelihood of fall hazards, and the correct use of personal fall arrest systems.

NEVER use fall protection equipment of any kind to hang, lift, support, or hoist tools or equipment, unless explicitly certified for such use.

Equipment subjected to forces of fall arrest must immediately be removed from use.

Age, fitness, and health conditions can seriously affect the worker should a fall occur. Consult a doctor if there is any reason to doubt a user's ability to withstand and safely absorb fall arrest forces or perform set-up of equipment. Pregnant women and minors must not use this equipment.

Physical harm may still occur even if fall safety equipment functions correctly. Sustained post-fall suspension may result in serious injury or death. Use trauma relief straps to reduce the effects of suspension trauma.

WARRANTY: Guardian warrants to Buyer that all products are free from defects in material, workmanship, and design (if a Supplier-responsible design), however this warranty does not cover conditions resulting from normal wear and tear, neglect, abuse, accident or otherwise. Guardian's obligations under this warranty apply for the lifetime of the products and are limited to the replacement of product only. This warranty is not transferable to any other Guardian service and does not apply to product that is resold after having been put into service. No other person, firm, entity, or the like is authorized to assume or assign for Guardian any other liability in connection with the sale or use of Guardian's products. Furthermore, this warranty is void if any product is changed or altered in any way, or if the product is used in a manner other than for which it is intended. There are no implied warranties of merchantability or fitness for a particular purpose, which are specifically disclaimed.
